

RESIDENTIAL NOTIFICATION

Electric Peak Usage Alert

The City has been notified by Missouri Public Utilities Association (MPUA) that excessive heat this week means peak electric usage could occur from **3:00 to 6:00 pm from Monday, June 13th through Wednesday, June 15th** that may have an impact on local electric utilities.

The MPUA is requesting that residential customers, large commercial and industrial customers voluntarily reduce and conserve electrical use during this time. Several recommendations have been provided but are not limited to:

- ✓ Set thermostat as high as possible while maintaining reasonable comfort levels.
- ✓ For windows that receive direct sunlight, keep shades closed during the day.
- ✓ Avoid using heat producing appliances such as ovens and dryers.

Another notification will be sent by the MPUA if demand may outpace supply, requiring additional action to reduce demand for electricity to avoid blackout conditions.
