## RESIDENTIAL NOTIFICATION

### Service Line Notification Letters

Published October 31, 2024

Attention City of Marceline water customers: you may be receiving a letter in the next few days from us concerning water service lines.

The City of Marceline, as your public water system, was required to submit a lead service line survey to the Missouri Department of Natural Resources as required by the federal Lead and Copper Rule Revisions (LCRR) in 40 CFR 141.84 and 141.85 by October 16, 2024 as were all public water systems. This inventory includes the service line materials used for both the City and Customer side of water meters for all water connections. In December 2023, the City sent out surveys, issued a news release and social media post asking for water customers to respond to a customer line survey to supply information concerning their service line information on the customer side of the meter.

That survey was submitted on October 16, 2024 and there are still several services marked as unknowns on both the City and Customer sides of the meter. The City has contracted with Hydrovac of Missouri to assist in identifying those unknowns. That work should begin in 2025 and the City will announce via media sources when a start date is known.

As part of the requirements of the LCRR, the City is required to notify our customers of known or potential service lines containing lead within 30 days of the submission of our initial survey. These letters were sent out as part of that requirement. The notification letters will notify those whose service line is currently classified as being confirmed lead, confirmed galvanized requiring replacement (GRR) or having a lead status unknown at this time as well as other pertinent information. If you have any questions please contact Water Superintendent Mikeal Thompson at [mikeal.thompson@marcelinemo.us](mailto:mikeal.thompson@marcelinemo.us) or via phone at 660.376.0700.
